

EDUCATION

University of California, San Diego | Cumulative GPA 3.72 | La Jolla, CA

Expected Graduation June 2027

Bachelor of Science: Data Science

Relevant Coursework: Data Structures & Algorithms (Python), Product Marketing & Management

EXPERIENCE

IT Front Desk | *Norco College Counseling* | Norco, CA

May 2023 - June 2025

- Assisted more than 500+ students with IT related issues, navigated college websites Edunav, MyPortal, troubleshooted laptops, desktops and password resets
- Performed data entry through SARS Anywhere and Excel while managing general counseling schedule simultaneously
- Mentored 50+ incoming students through personal experiences and acclimating them to college life, providing essential guidance to their journey, contributing to their academic success

Outreach Aide I | *Norco College Outreach* | Norco, CA

July 2023 - June 2025

- Represented Norco College and advocated for the community college path at career fairs, high schools and Riverside City College events through tabling
- Tour guide for 100+ guests during Norco College visitation days for various groups including high school, elementary school, and students with disabilities
- Setup outreach activities for incoming students and delivered speeches at peer panels

PROJECTS

DS3 EV Transitions Project | *UCSD Center for Energy Research (CER)* | San Diego, CA

April 2026 – June 2026

- Led consulting team and continued development of public facing dashboard analyzing how EV adoption affects oil dependency across 50+ countries from 2010-2035 using IEA energy data
- Designed UI with Figma and cleaned up frontend, with interactive features like selectable country rankings, and hover based projection charts to generate curiosity, incentivizing the adoption of EVs to non technical users
- Presented project findings to CER's management; with approval for publication on UCSD's official .edu domain to support researchers and the general public in exploring EV transition trends

Power Outage Duration Prediction | *Predictive Data Analysis Project* | San Diego, CA

Feb 2026 – Mar 2026

- Built an end-to-end machine learning pipeline to predict power outage duration using a dataset of 1,500+ U.S. outage events from 56 to 20 engineered features
- Trained feature selection model using Random Forest domain reasoning to reduce dimensionality and improve interpretability
- Tuned a Random Forest regressor with GridSearchCV 5-fold CV, reducing RMSE compared to a baseline linear regression model
- Conducted permutation-based feature importance analysis, identifying outage cause as dominant predictor of outage duration, communicated findings through data visualizations on website

LEADERSHIP & PERSONAL DEVELOPMENT

California College Corps | *Fellow* | Norco, CA

August 2023 - June 2024

- Brought awareness to food insecurity on campus through outreach initiatives and volunteered at the Basic Needs and Wellness Food Pantry assisting with tabling, clothing drives and farmers markets (400+ hours)
- Helped 100+ students with food insecurity, handing out groceries and living essentials.
- Assisted with 20,000+ sq ft of fire prevention yard work, for disabled individuals from the Norco community

SKILLS

Programming Languages: Python, C++, Java, SQL, R

Libraries: XGBoost, SHAP, Pandas, Matplotlib, Scikit-learn

Tools: Microsoft Excel (MOS Certified), Power BI, Figma

Frameworks: Streamlit

Languages: English & Mandarin
